

LEGISLATIVE ASSEMBLY

Select Committee on Remote, Rural and Regional Health

Supplementary questions for witnesses – Thursday 12 December 2024

The implementation of PC2 recommendations relating to cross-jurisdictional health reform and government consultation with remote, rural and regional communities

Culcairn Local Health Advisory Committee

1. Following the release of the [Strengthening local health committees across regional NSW report](#), NSW Health states that it is working to implement 5 guiding principles that promote the role of local health committees.
 - a. Have you noticed any progress against this commitment? (NSW Health, [Progress Report](#), p 89) (**Recommendation 42**)
2. How easy or difficult is it for your community to access information about the availability of health services, wait times and the minimum service standards for health facilities? (**Recommendation 42**)

Culcairn LHAC response

- 1 No noticeable progress. This has limited awareness amongst the wider population.
- 2 It is very difficult to access information on services within the community. There is no one place people can go to in identifying services across both LHD and the PHN networks which document information.
