PETITION: Don't pour fuel on the climate fire

Citizens of NSW are already living with the devastating effects of the climate crisis, in the form of fires, floods and heatwaves that threaten our families.

But coal companies want to pour fuel on the fire.

They have plans for more than 19 new coal mine expansions in NSW that would produce lifecycle greenhouse gases 15 times as big as our state's current emissions.

The proposed Hunter Valley Operations Continuation Project (HVO) near Singleton in the Hunter Valley is the largest coal expansion ever proposed in NSW.

We're asking you to put climate action first, scrap pro-coal policies that facilitate coal approvals and stop greenlighting coal expansions.

Signed by 5345 concerned citizens
