

I promised some links to the gas transition roadmaps underway:

- ACT integrated energy plan: <https://www.climatechoices.act.gov.au/energy/canberras-electrification-pathway>
- VIC gas substitution roadmap and RIS: <https://www.energy.vic.gov.au/renewable-energy/victorias-gas-substitution-roadmap>

I also promised some further information on embodied carbon. ASBEC launches our final report next week, but you can read the issues paper and international policy studies here:

<https://www.asbec.asn.au/research-items/issues-paper-embodied-carbon-emissions-in-australias-built-environment/>

As for the questions on notice, there have been some good collaborative sessions led by Insurance Council of Australia, Master Builders Australia and Planning Institute of Australia over a series of industry and government roundtables in the last few years: [Final-Communique-National-Forum-Land-Use-Planning.pdf](#)

I also note that the Building Ministers Meeting (of which NSW building minister is a member) has tasked the Australian Buildings Codes Board with a clear resilience mandate () – this is an opportunity for NSW to collaborate on a national resilience initiative.

If you have any further questions please reach out.

Thanks

Alison Scotland
Chief Executive Officer
Australian Sustainable Built Environment Council
