**INQUIRY INTO INQUIRY INTO PFAS CONTAMINATION
IN WATERWAYS AND DRINKING WATER SUPPLIES
THROUGHOUT NEW SOUTH WALES**

Name: Macciza Macpherson

Date Received: 27 November 2024

I apologise for the lateness and brevity of my submission. It is being done at the eleventh hour. I could provide a more substantial submission with an extension but I am currently busy with the Drug Summit

I request the committee to investigate the use of Hemp, Cannabis Sativa as a a frontline remediation methodology.

Here are a few links that should get you started on this path.

I urge the committee to give this research the attention it deserves.

<https://wastemanagementreview.com.au/could-hemp-be-a-front-line-fighter-against-pfas/>

<https://www.newcastle.edu.au/newsroom/featured/researchers-to-remediate-pfas-contamination-with-hemp-seed-proteins>

<https://hempgazette.com/news/hemp-pfas-remediation-hg2348/#:~:text=In%20Australia%2C%20a%20submission%20to,that%20are%20resistant%20to%20degradation.>

<https://www.chiefscientist.nsw.gov.au/news/high-hopes-for-hemp-seed-solution-to-firefighting-foam-contamination>

I have provided local links so that you may directly approach them to supply additional information in support of my claim of Hemp as a PFAS remediation strategy..

It's amazing what Hemp can do ...

Regards

Macciza Macpherson
