## Submission

As a 36 year resident of Balmoral, I have invested time and money in improving my property to support local wildlife. I am devastated about the impact roaming pet cats are having on our native wildlife. I have seen 3 cats enter my property but hear even more at night. I therefore support sensible amendments to the law to enable local governments to enforce anti-roaming laws for pet cats, bringing NSW into line with almost every other state.

I know cats are valued companion animals but they are also one of the world's most successful predators. In NSW, approximately 96 million native mammals, birds and reptiles are killed by roaming pet cats every year – with about 110 native animals killed by each roaming, hunting pet cat. Unfortunately about 70% of cat owners still allow their pets to roam

We can't change the nature of cats, but we can change the culture that allows pet cats to roam and kill. We urgently need responsible pet ownership, and this starts with clear rules to ensure pet owners keep cats contained to their property to save our native wildlife. Just as I contained my dog at night, it is the responsibility of owners to contain their cats. An added benefit would be healthier and longer lives for cats and quite possibly less veterinarian bills for owners.

This reform should be accompanied by funding for education, compliance and to make desexing and registration easier. We also need clear rules around desexing by 4 months of age to prevent unwanted breeding and requirements for all local governments to develop and implement companion animal management plans.

I am therefore calling on the NSW Government and the Animal Welfare committee to support:

Amendments to the NSW Companion Animals Act 1998 to enable local governments to enforce anti-roaming laws for pet cats at a local level, bringing NSW into line with almost every other state.

State government funding of a minimum of \$9 million to fund compliance, education, desexing, identification and registration programs.

Requirements for all local governments to develop companion animal management plans to protect wildlife, as is required in Victoria.

Development of a state-wide web resource for responsible pet ownership.

Making desexing mandatory state-wide by 4 months of age, as is required in WA, Tasmania, ACT and SA.

Kind Regards,

Joanne Gerritsen
