**INQUIRY INTO 2024 ANNUAL REPORT OF THE NET
ZERO COMMISSION**

Name: Dr Anthony Martin

Date Received: 12 February 2025

So much of the pristine farmland of NSW has been surrendered to huge and hideous coal mines, that common sense says 'stop'. But now the fact of the end-result of all this coal production is a burden the atmosphere simply can no longer handle - irrespective of where on the planet its burning takes place - puts a huge obligation on anyone aiding and abetting its ongoing extraction. Please, despite the economic temptation to approve more of the same, desist from doing so.
