INQUIRY INTO 2024 ANNUAL REPORT OF THE NET ZERO COMMISSION

Organisation: Ryde Gladesville Climate Change Action Group
Date Received: 11 February 2025

I am contacting on behalf of the Ryde Gladesville Climate Change Action Group. For nearly 20 years our group has been organising local actions to draw attention to the urgent need for climate change action and to reduce carbon emissions.

Approving new coal mines and gas fields undermines all the good work that is being done in NSW by establishing Renewable Energy Zones. I am convinced that all members of the NSW Net Zero Commission are across the science and the IPCC reports. Please act on the science and not on the efforts by the fossil fuel industries to convince you that they are very supportive of renewable energy while also pushing for more coal and gas mining for exports. NSW is responsible for these scope 3 emissions. Please do not fall for the seductive green washing efforts, and the donations to political parties by the fossil fuel industries and prioritise the Net Zero Future.
